Make your products and services available 24 hours a day with our custom modules made upon your specific request.

3. Streaming

Fonlider has a great deal of experience in the areas of video and audio streaming. We can provide streaming hosting services as well as converting or encoding your audio and video files to Flash Video or Windows Media Video streaming formats.

The diversity of our services goes from the provision of the streaming service, to the onsite setup of the streaming hardware. As part of the process, we can also evaluate different options for cameras, PCs and streaming media server technology to determine which will be most suitable to meet your requirements.

Technical features:

- The last generation of audio/video servers
- Various bit –rate signal streaming (148kb/s, 282 kb/s ...)
- Appropriate IP address space
- 24 hours control and surveillance on server
- Statistics on monitoring your programs
- 24/7 technical support
- Conference calls
