## OneClick SMSC solution for SMS aggregators

---

The OneClick SMSC enables operators to fulfill today's demand for messaging services offering them highly available, efficient and cost-effective solution. It is a feature-rich, high performance platform that offers high capacity traffic and ensures good quality services.

Based on advanced technologies and standard protocols the platform is transparent to the network and easy to deploy. Interworking with other SMSC and application is ensured using standard protocols such as SMPP or HTTP. Operators can deploy popular services such as ring tones, picture messaging and enhance user experience offering a wide range of value added services. The solution is suitable for: MT bulk for advertisement campaigns, MO for subscriber responses to advertising, radio/TV broadcasts, contests, Store and forward for MO SMS.

The OneClick SMSC offers continuity of service and preservation of essential data. It contains several methods of redundancy providing stable functioning without losing any messages.
